

Solution Portfolio Summary

Security Inspection

Element Series

An ultimate security inspection, streamlining operations and relieving overworked teams

Installation-free, supporting air-gapped environments on the target ICS

Removable media sanitizer before bringing it into the working environment.

Easy operation to make the process convenient for any user

Endpoint Protection

Stellar

ICS endpoint protection for both modernized and legacy assets

Minimal downtime for mass deployment

4-in-1 lockdown for legacy and un-patchable devices

ICS-NGAV for modernized and patchable devices

Network Defense

Edge Series

Security appliances to segment the network with zero-trust protection

Easier deployment on the rack or in the cabinet

Robust hardware to support wide temperature range and long MTBF

Fail-safe without interrupting production even on hardware failure

CPS Platform

SageOne

Comprehensive security platform for monitoring and managing OT infrastructure

Asset lifecycle management across TXOne security solutions

Vulnerability management and monitoring of critical assets

CPS Protection Platform detects and response to potential OT threats
