

Build IT Resilience through Cyber GRC Automation

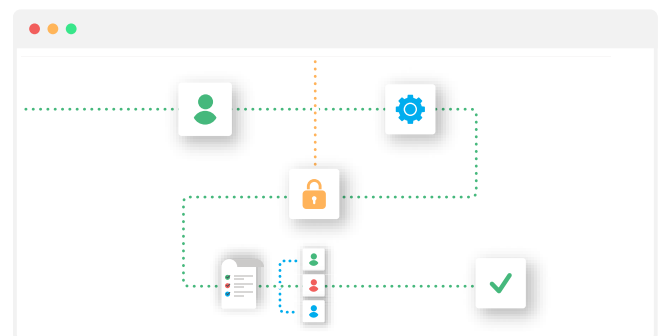

Put Cyber GRC on Autopilot

Commugen's platform automates tedious GRC tasks, freeing your security team to focus on what matters most – proactive threat hunting and strategic security initiatives.

Clear, Unified Visibility

Gain a single pane of glass view into your entire security posture. Our powerful visualization tools and API integrations let you continuously monitor your security processes and make informed decisions.

Customizable & Future-proof

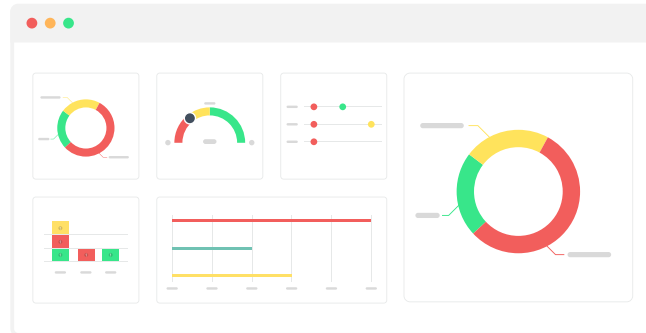

Unlike one-size-fits-all solutions, Commugen's platform is built for cyber GRC, and being a no-code platform, it's easy to customize workflows, reports and dashboards that adapt to your evolving needs and threat landscape.

Trusted by leading enterprises:

Risk Communication Made Easy

Utilize industry frameworks like MITRE ATT&CK to clearly communicate risks across your security team. Native dashboards keep senior management, boards, and regulators fully informed.

Proven Results

Fortune 500 companies and leading organizations like Teva, Amdocs, and international banks trust Commugen to automate cybersecurity GRC, save valuable time, and revolutionize their security programs.

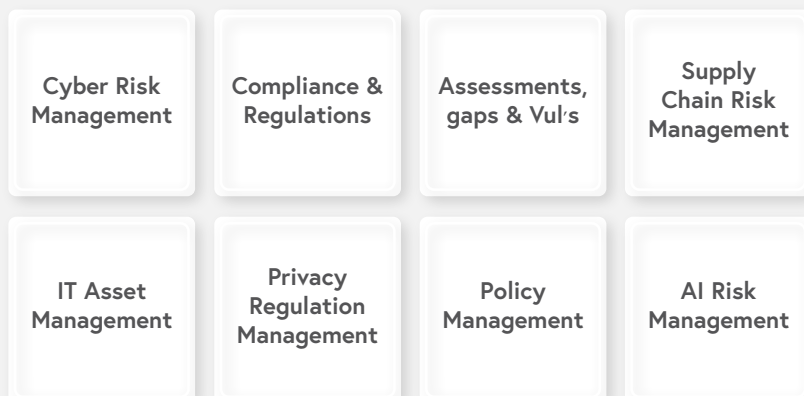

Effortless Deployment

Get up and running in weeks, not quarters. Our platform is cloud-based or on-premise to fit your needs.
